

Advance Excel Assignment 3

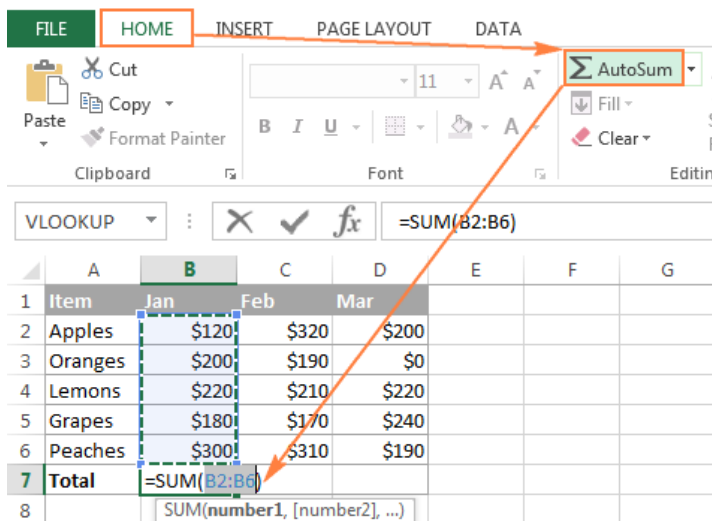

1. How and when to use the AutoSum command in excel?

Ans- Autosum is a built-in summation feature to automatically add up numbers in a few clicks.

How to use AutoSum command

>Keyboard shortcut key Alt+=

>Home tab>Editing Group>AutoSum button

When to use AutoSum

- >Quick Calculations- through AutoSum button
- >Updating calculations-when a number is added or removed
- >Calculating totals-on selected columns or rows
- >To check calculation error

Ans- Alt+= is the shortcut key to perform AutoSum.

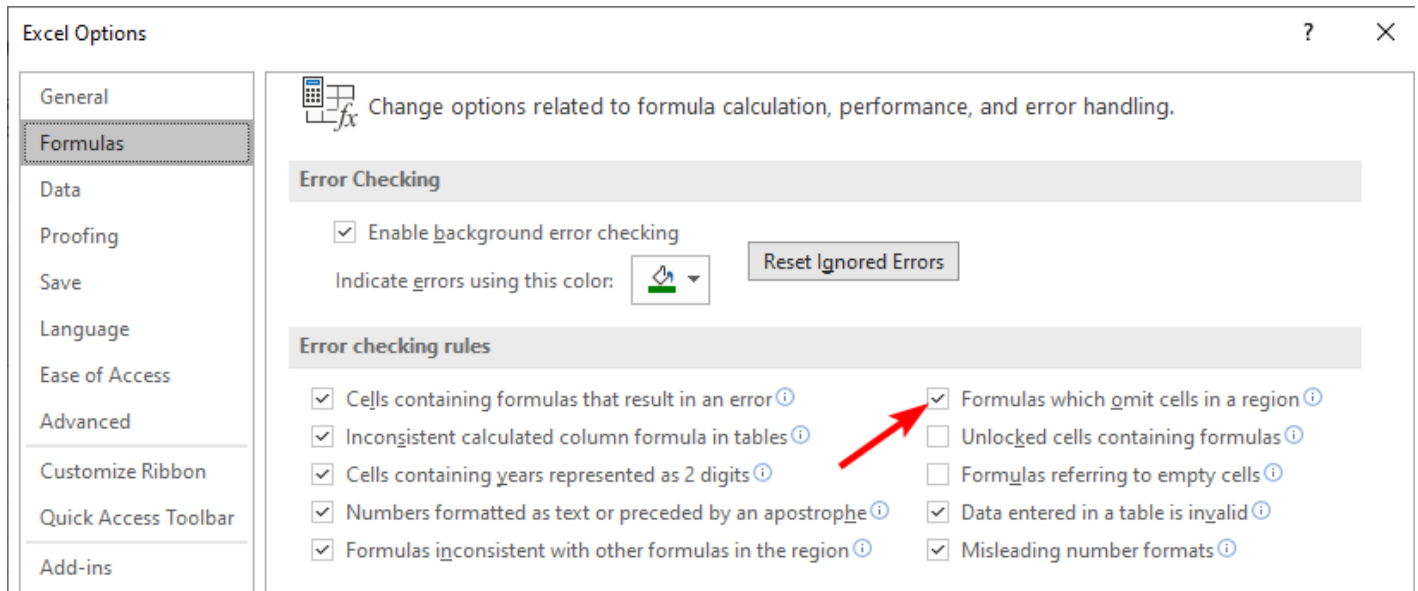

The screenshot shows the Microsoft Excel interface. The 'Home' tab is selected on the ribbon. The 'AutoSum' button is highlighted in the 'Editing' group. Below the ribbon, the formula bar shows the formula `=SUM(A1:A5)`. The spreadsheet displays a table of numbers in columns A through E, with the sum of each column calculated in row 6. The sum values are 992, 1670, 1272, 1764, and 1822, which are highlighted with a red border. A green box with the text 'ALT + =' is overlaid on the spreadsheet, indicating the shortcut key used to insert the sum formula.

	A	B	C	D	E
1	137	235	238	213	310
2	235	409	258	380	260
3					42
4					38
5					72
6	992	1670	1272	1764	1822
7					

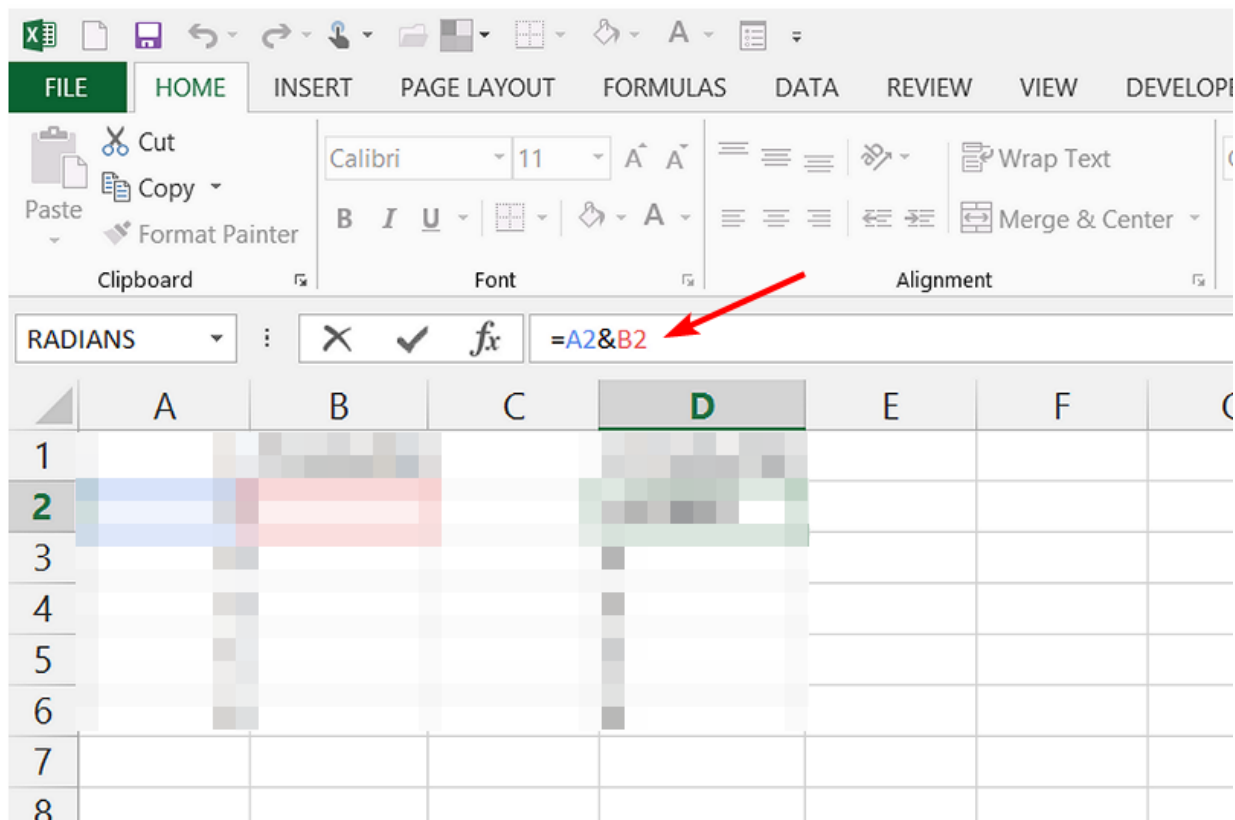

3. How do you get rid of Formula that omits adjacent cells?

Ans- Formula that omits adjacent cells is an error which can be resolved by

a) By unchecking formula that omit cells
